

Our School Today

Our school is one of the experimental schools included in "Schools for the Implementation of Experimental Education Programs".

A school in each prefecture was selected by the Pedagogical Institute of the Ministry of Education to join the program in 2000. In our prefecture, **our school was selected**. Today the school complex of the Gymnasio - Lykio has approximately 400 and 270 students respectively, and is housed in buildings built in 1955, immediately after the earthquakes, with a fundraiser from our Cypriot brothers, hence named "Pankyprion". On December 24, 2018, the 1st Junior High School of Volos was twinned with the Pancyprion High School of Nicosia in Cyprus.
